

# INVERCARGILL AIRPORT

Invercargill Airport offers a range of quality services, facilities and opportunities to support aviation activity.

Located just 3km from Invercargill's city centre and 28km from South Port in Bluff, Invercargill Airport is the southernmost controlled airport in New Zealand.

## FLIGHT SERVICES

Our regular air transport services provide connections to all main airports including scheduled direct flights to Christchurch and Wellington (operated by Air New Zealand), Stewart Island (operated by Stewart Island Flights) and regular national and international charter flights.

Invercargill Airport also acts as an alternate option for Queenstown Airport during winter ski season and weather diversions.

The airport is certified to accommodate small private international passenger flights and customs inspection and quarantine areas can be made available by prior arrangement.

## RUNWAYS

Our sealed runway is 2210m long, 45m wide, making it fully capable for all narrow-bodied commercial jet aircraft. The runway is strengthened to accept the maximum weight of a Boeing 757 aircraft. We also have two further grass runways and full air traffic control services available 24 hours per day on request.

## ABOUT INVERCARGILL

Situated at the far south of the South Island with a population of about 50,000, Invercargill is the commercial centre of the Southland region, prosperous with large industry business including agriculture, fishing, forestry, tourism, manufacturing and energy.

Famed for its welcoming hospitality, Invercargill acts as a pivotal gateway to some of the country's most popular tourism areas including Fiordland, Stewart Island, Catlins and Queenstown.
